

**Letter of recommendation  
for Aljaž Tepina**

Šmarje pri Jelšah, 01. 09. 2015

Dear Sir or Madam,

I have known Aljaž for 5 years and I have been working on many projects with him. During my career at the university and in the creative industry, I have never met a student with such a genuine and focused interest in video production.

We started working together at Out of the Box, monthly events at the University of Maribor where he was a head of video production and also helped immensely with the organization in general. I was director of Out of the Box and creative director at RAZ:UM (Research and Arts Zone at the University of Maribor) at the time. We also worked together on several projects at Samino studio: from producing promotional videos, short fiction movies, and a documentary, to designing and building websites.

In our extensive collaborative work I found many virtues Aljaž possesses. He has a rich combination of virtues from which I would especially emphasize his organizational skills, team work, 100 % reliability and responsibility, the ability to take initiative, seeking perfection in every project or product he works on, and his enthusiasm to read, study and learn new thing.

During our cooperation and joint projects Aljaž has been involved in camera filming, film direction, video editing, film producing, web programming, different organisational tasks, including leading smaller teams, and he has always performed very well. I also wish to highlight he is constantly evolving creatively and he is a master in video editing - practically and theoretically.

In conclusion, Aljaž Tepina insight and a wide range of knowledge make him a candidate worthy of your most thorough consideration.

Sincerely,

Marko Samec, PhD  
creative director and CEO
